

Process Innovation for Law Enforcement

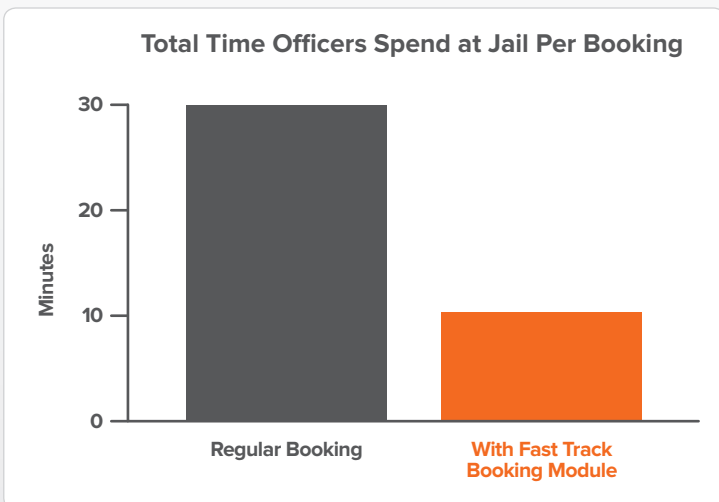

Your Law Enforcement Agency can eliminate hand-written forms, manual paperwork, reporting errors, and other inefficiencies with specialized process innovations from SolidCircle.

SolidCircle has invested 24,960 hours over 4 years to develop Process Innovations for Law Enforcement Agencies.

With Fast Track Booking, arresting officers now spend less than 10 minutes at the jail to process each booking. That's 67% less time spent at the jail, which means more time spent on patrol.

Maximize Efficiency in Every Department

SolidCircle can help you solve efficiency problems that will benefit everyone in your agency:

- Patrol Officers will spend less time on manual processes such as writing reports by hand, copying data from Central Dispatch, or looking up arrest codes
- Jail Officers will be more informed and prepared for each incoming booking
- Clerical Staff will spend less time scanning forms, entering data, and managing documents
- Supervisors will be able to monitor activities in real time and generate statistical reports with ease

Faster & Easier Activity Reporting

Daily is a web-based application that allows officers to easily record their daily activities and statistical data from anywhere, even from their car.

- Import data from Central Dispatch with the click of a button
- Track and report time spent in different jurisdictions
- Search archives to quickly find past reports
- Report statistics accurately and easily
- Monitor activities across all locations in real time

Faster & Safer Jail Booking

Fast Track Booking is a web-based application that allows arresting officers to pre-book individuals from the car so the jail can be better prepared.

- Arresting officers easily create Fast Tracks by selecting the person to be booked and downloading complaint data and other information from Central Dispatch
- Jail officers monitor all Fast Tracks in real time, view medical and safety alerts for each individual, and process bookings faster
